

I am stongly in favor of limiting the concentration of broadcast properties in ANY market of ANY size to a single television broadcast television station and a single radio station. I strongly favor maintaining the broadest possible ownership of broadcast properties in every size market in order to insure the widest possible number of veiwpoints and the smallest possible level of economic clout. This is not an economic issue, but a civil liberties one. Our civil liberties are made possible through this diversity and ANY steps taken to permit duopolies or other levels of increased ownership in a single market is harmful to our present and future liberties.

Dan Storck
